GLOBAL BUSINESS TRANSFORMATION WITH SAP S/4HANA

CUSTOMER: CARL ZEISS AG

PRESENTED BY: BUSINESS PROCESS CONSULTANT

EXECUTIVE SUMMARY

ZEISS is facing increasing global complexity driven by semiconductor growth, regulatory pressure, and supply chain volatility.

To remain competitive and scalable, ZEISS must move from fragmented regional systems to a unified global operating model.

We recommend implementing SAP S/4HANA supported by standardized global process templates and strong governance.

This transformation will enable transparency, operational control, scalability, and long-term growth.

WHY TRANSFORMATION IS CRITICAL NOW

- Rapid semiconductor demand requires scalable operations
- Industry 4.0 demands real-time integration and precision
- Supply chain volatility increases operational risk
- ESG & regulatory requirements require reliable global data
- Cybersecurity threats demand centralized governance

These forces make global standardization not optional but strategic.

BUSINESS MOTIVATIONS & GOALS

ZEISS KEY MOTIVATIONS

Based on our analysis, ZEISS aims to:

- Harmonize and standardize global processes through a unified template
- Increase transparency and governance with centralized ERP visibility
- Enable scalable growth in semiconductor and advanced manufacturing markets

TARGET BUSINESS OUTCOMES

- One global operating model
- Faster integration of new entities and acquisitions
- Real-time financial and operational reporting
- Reduced IT landscape complexity and cost
- Stronger risk management and compliance control

OUR RECOMMENDED APPROACH

SWOT Analysis:

- Identify strengths in ZEISS's global capabilities
- Address process inconsistencies
- Align opportunities with semiconductor growth
- Mitigate operational risks

Systems Thinking

- Understand interdependencies across business units
- Design integrated end-to-end processes
- Ensure SAP S/4HANA supports global governance

PROJECT TEAM

Core Project Roles:

- Project Manager: Governance, scope, executive alignment
- Business Process Consultant: Global template design
- SAP S/4HANA Technical Consultant: System configuration & integration
- Solution Architect: Enterprise architecture alignment
- Data & Governance Lead: Master data harmonization
- Change Management Lead: Adoption across regions

IMPLEMENTATION ROADMAP

Phased Rollout Roadmap

Phase 1 – Design & Blueprint

Phase 2 – Build & Test Global Template

Phase 3 – Regional Rollout & Stabilization

IMMEDIATE NEXT STEPS

Immediate Next Steps

- Confirm transformation scope and governance structure
- Launch global stakeholder workshops • Define global process ownership
- Finalize phased rollout plan
- Approve program funding & timeline
